Steps

1 | Connect phone cord to Magic Box

2 | Connect phone cord to wall jack

3 | Connect power adapter to Magic Box

4 | Press green terminal button to verify connection

Step 1

Connect phone cord to Magic Box

Connect one end of the included phone cord to the socket on the Magic Box labeled with a *phone IN* icon. It is next to the larger Ethernet port.

Steps

1 | Connect phone cord to Magic Box

2 | Connect phone cord to wall jack

3 | Connect power adapter to Magic Box

4 | Press green terminal button to verify connection

🚫 **Do not connect line through a fax machine** or other dialing device.

🚫 **Do not use a phone cord splitter** appliance or any other intermediate connector between the terminal and the wall jack.

Step 2

Connect phone cord to wall jack

Connect the other end of the cord directly into the phone jack in the wall. Splitting the line through any other device, such as a fax machine, is not recommended.

Steps

1 | Connect phone cord to Magic Box

2 | Connect phone cord to wall jack

3 | **Connect power adapter to Magic Box**

**4** | Press green terminal button to verify connection

Step 3

Connect power adapter to Magic Box

Connect one end of the round power adapter to the Magic Box and plug the other end into a wall outlet.

Steps

1 | Connect phone cord to Magic Box

2 | Connect phone cord to wall jack

3 | Connect power adapter to Magic Box

4 | **Press green terminal button to verify connection**

UP:
DIAL-UP
CONNECTED

DOWN:
DIAL-UP NOT
CONNECTED

Step 4

Press green terminal button to verify connection

Press the green **terminal button** to access the main status menu. In order for the terminal to connect for a transaction, the phone line must have a steady dial tone and should not be in use. The connection status is indicated by the direction of the phone icon on the status bar at the top of the screen. Contact support at **1-888-886-8869** if unable to test successfully.
